EDUCATION

Lahore Garrison University

Bachelors in Computer Science

- Involvement: CS Society, AI ML Club, Web Dev Circle

Lahore, Pakistan

Sep 2023 – 2027

EXPERIENCE

Administrative Intern – Microsoft Office Suite

May 2021 – July 2021

BMKTC (WAPDA Hall), Lahore, Pakistan

- Utilized Microsoft Office Tools to prepare official documents, manage structured data, and format presentations.
- Supported administrative operations by maintaining digital records and assisting in report generation.

Junior Analyst - Geopolitical Research

Aug 2023 – Present

Lahore Garrison University (LGU), Lahore, Pakistan

- Researched themes like fascism and national identity crises in Pakistan.
- Conducted trend analysis of South Asian geopolitics under faculty guidance.

PROJECTS

Pharma Management System | C++

March 2024 – April 2024

- Developed a console-based pharmacy management tool supporting inventory tracking, billing, and stock control using C++ structures and arrays
- Included key features such as add/update/delete medicines, auto-billing, low-stock alerts, and daily reports logged to text files
- Designed with a modular architecture to allow for future database integration
- **GitHub Repo**

WordsWiz Text Utility | React.js, Web Speech API

Jan 2025

- Built a single-page React application for real-time text transformations including uppercase/lowercase, sentence case, and punctuation removal
- Enabled clipboard copy/paste functionality and integrated speech synthesis using the Web Speech API
- Improved user experience by adding live word and character counters, estimated reading time, and a responsive Bootstrap layout
- **Live App | GitHub Repo**

Weather App | JavaScript, OpenWeatherMap API

Nov 2024 – Dec 2024

- Created a web application to display current weather and 7-day forecasts based on user-provided city input
- Included features such as auto-updates, weather icons, temperature unit toggle (°C/°F), UV index display, and error handling for invalid cities
- Used modern JavaScript with async/await, Fetch API, and responsive CSS layout using Flexbox and Grid
- **Live App | GitHub Repo**

Task Lister (To-Do App) | JavaScript

Aug 2024 – Sep 2024

- Built a responsive web-based task manager allowing users to add, delete, mark complete, and filter tasks
- Implemented localStorage for data persistence and enhanced interactivity using CSS animations and dynamic DOM updates
- Added features such as task prioritization, due date input, and bulk clearing of completed tasks
- **Live App | GitHub Repo**

TECHNICAL SKILLS

Languages: C++, JavaScript, SQL, HTML, CSS

Frameworks/Libraries: React.js, Bootstrap

Databases: MySQL, SQL Server

Tools: Git, GitHub, VS Code, Dev C++

Other: MS Office, Windows OS, Team Collaboration
